About The Product-

Imagine the wonder of having your own home float tank experience, even if you've only floated once. Welcome to the Home Float Plus by Dreampod, where we've combined innovation and a unique, cool design to bring the ultimate floatation experience to your doorstep.

We've taken our best-selling commercial pod and transformed it into an affordable option for the everyday individual while preserving the renowned durability and stunning aesthetics that define the Dreampod brand. The Home Float Plus boasts a handcrafted exterior made from top-tier fiberglass and plastics, meticulously polished to a high-gloss finish. This not only delivers an aesthetically pleasing look but also ensures easy cleaning and maintenance. Inside, a solid foam core enhances soundproofing and heat retention, providing a cozier float experience and reducing energy costs.

Designed to seamlessly integrate into your home, Home Float Plus features a user-friendly wired control panel for everyday operation. The built-in filtration system includes an integrated UV light, a 10-micron filter, and a single chemical injector to maintain water quality effortlessly. With these essential features, your Home Float Plus experience is made hassle-free and enjoyable.

More Information-

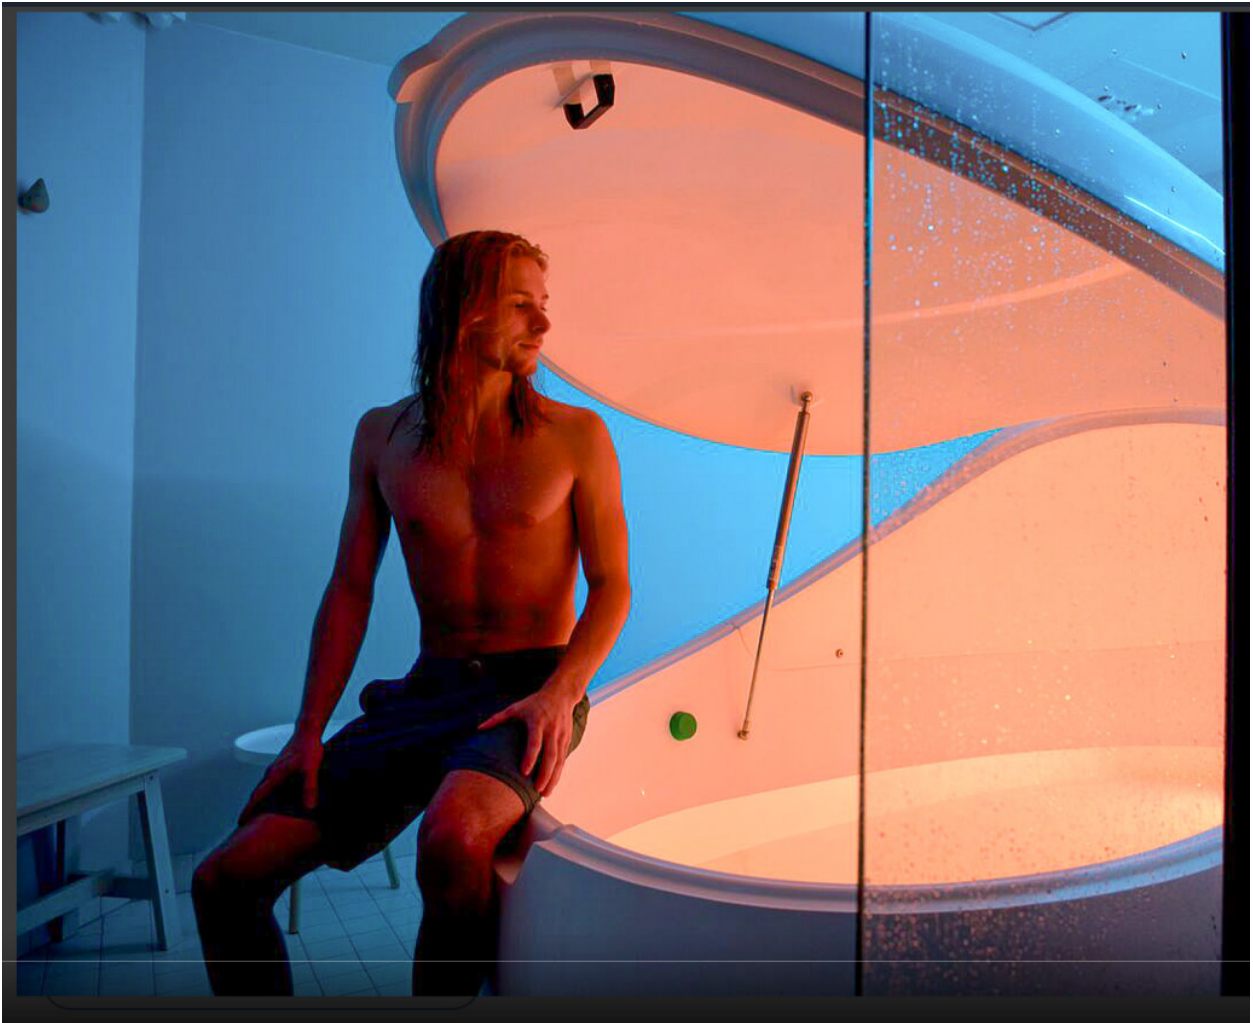

The interior of the Home Float Plus is no exception. It boasts the same exquisite finish as the exterior, offering a polished and visually appealing experience. What sets it apart is our meticulous engineering of a passive air circulation system, designed with the sole purpose of enhancing the floatation experience while maintaining optimal temperature control and soundproofing. Inside, you'll also discover a calming LED lighting system, which can be left on for a soothing ambiance during your float or easily switched off for complete darkness. For added safety, we've included an anti-slip surface on the floor.

The Dreampod Home Float Plus is a testament to quality and reliability. All critical components are sourced from the United States, Japan, and Europe, each certified by their respective governing bodies to ensure the highest standard of quality and performance

Software control:

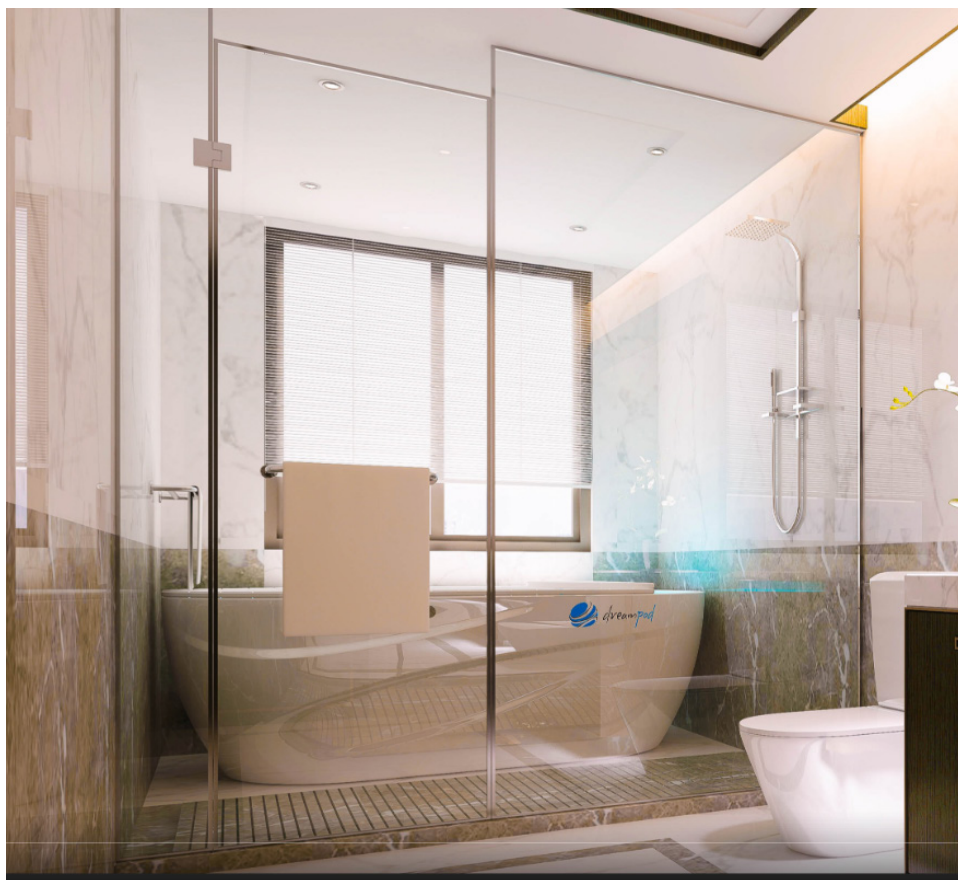

The Dreampod Float Plus is controlled via an easy to use wired remote control. You will be able to control how long you want to float, the temperature of the water, as well as run the chemical injector for sanitizing the solution.

Mineral Soaker

The Dreampod Mineral Soaker is another amazing product in the Dreampod line up. The concept and idea of an epsom salt bath and created a luxurious product ideal for your business or personal use. The Mineral Soaker allows you to dial the temperature of the water up above the standard temperature used for floating and create an incredibly relaxing experience that's also benefiting you from the inside out. Soaking in hot, mineral infused, water allows your body to relax and recover. like it is as the brother to the Dreampod Ice Bath. Purchase the pair and cover the entire spectrum of hot and cold therapy. Whether you're looking for an addition to your existing business, another way to attract clients, or you're wanting a way to relax and rehabilitate at home, the Dreampod Mineral Soaker has you covered.

Some benefits of using the Mineral Soaker-

It's been reported that up to 57 % of the world's population does not get the recommended amount of magnesium needed to maintain health and wellness. Magnesium happens to be one of the main ingredients present in epsom salt, which is used in the Dreampod Mineral Soaker. By soaking in the warm waters of the Mineral Soaker the body will absorb trace minerals, as well as magnesium. This aids in building immunity in the body and can help boost resistance to illness and disease.

One of the side effects of mineral deficiency in the body is fatigue. The Mineral Soaker helps combat this and soaking in the rich magnesium water can restore vital energy to the body and help in recovery and revitalization.

A mineral salt bath is a naturally alkaline solution. By using the Mineral Soaker, the body will neutralize acidity and help in the removal of potentially harmful toxins built up inside the body. Soaking in the warm water eases pain by alleviating stress on the joints and muscles of the body. It's also been

shown to speed up recovery after an injury, relieve muscle spasms, and even help with lessening menstrual cramps.

If you're looking for a way to improve the health of our body's largest organ, your skin, look no further. The minerals present inside the high-quality water of the Mineral Soaker help promote softer, smoother, and healthier skin. Not only is the epsom salt good for dry, itchy skin, but research also suggests there are antifungal benefits for the skin and nails.

Epsom salt isn't the only type of salt that can be used in the Mineral Soaker. There are a variety of salts that have proven to be safe and beneficial for soaking. Whether it's pink Himalayn salt, Celtic gray salts, or Hawaiian Alaea salt, all are safe to use in the Mineral Soaker. If you're feeling adventurous, mix and match the salts. Create and find the perfect blend for your perfect soak.

If you're wanting to incorporate an aromatic boost to your soak, a few drops of your favorite essential oil can be used with the Mineral Soaker. This can enhance the experience and provide a deeper, more relaxing state. However, keeping in mind using essential oils in the Mineral Soaker will require a bit more maintenance post soak.

The list of benefits goes on and on; decreases congestion, helps with allergies and other respiratory infections, boosts overall health by regulating blood sugar and improving cardiovascular health. Regular use also boosts the body's circulatory system and nerve function.

At the end of the day, the warm luxurious water of the Mineral Soaker simply just feels good. Who doesn't need to relax and feel good in today's world? You'll find yourself using it because you want to, not just because it's good for you. Indulge and treat yourself to the restorative benefits of the Dreampod Mineral Soaker.

Sport Float Pod

The Sport Float Pod, though smaller in size compared to the other commercial float tanks, comfortably accommodates floaters up to 7 feet tall. This compact design makes it an excellent choice for expanding your existing wellness business.

About The Product:

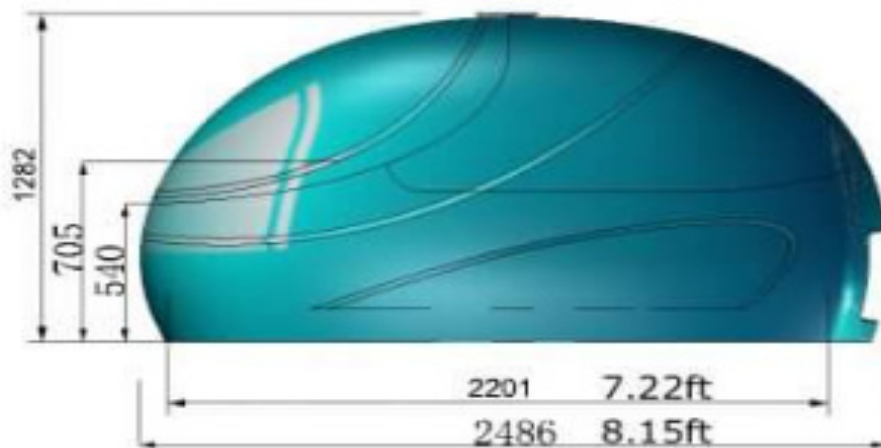

The finest entry level pod money can buy!

Dreampod Sport has been around for many years but after 2020 we saw the need to create a product that was reasonably priced, reliable, beautiful, and a great entry point for those new to the float world.

The Sport has everything you need to get started with your Business. It's compact, but comfortable and capable of floating someone 7 feet tall. The internal structure and design are the exact same as our flagship V2 pod and the big brother, the V-max. With an easy to operate wired control panel, you can control the temperature, the LED inside the pod, run the chemical

injector for easy sanitization, and set the time for each float session. The filtration system comes with a 10-micron filter, built in UV sanitization, and an inline heater. We made it simple and easy to operate and use every day.

The Dreampod Sport is ready to go when you are! Whether you're opening your first float related business, adding floating to your existing business, or even wanting to bring floating home. The Dreampod Sport gives you the biggest bang for your buck.
